1220. Count Vowels Permutation

Hint ...

Hard 2.7K 183

Companies

Given an integer n , your task is to count how many strings of length n can be formed under the following rules:

- Each character is a lower case vowel ('a', 'e', 'i', 'o', 'u')
- Each vowel 'a' may only be followed by an 'e'.
- Each vowel 'e' may only be followed by an 'a' or an 'i'.
- Each vowel 'i' may not be followed by another 'i'.
- Each vowel 'o' may only be followed by an 'i' or a 'u'.
- Each vowel 'u' may only be followed by an 'a'.

Since the answer may be too large, return it modulo $10^9 + 7$.

$n = 3$

a / e / i / o / u

$n = 1$

Example 1:

Input: $n = 1$

Output: 5

Explanation: All possible strings are: "a", "e", "i", "o" and "u".

Example 2:

Input: $n = 2$

Output: 10

Explanation: All possible strings are: "ae", "ea", "ei", "ia", "ie", "io", "iu", "oi", "ou" and "ua".

o a

$n = 2$

ae, ea, ei, ia, ie, io, iu, oi, ou and ua.

Example 3:

Input: $n = 5$

Output: 68

How to think from scratch

~~Show~~ ~~Type~~ ~~Gr~~

(*) options (Recursion)

$$n = 2$$

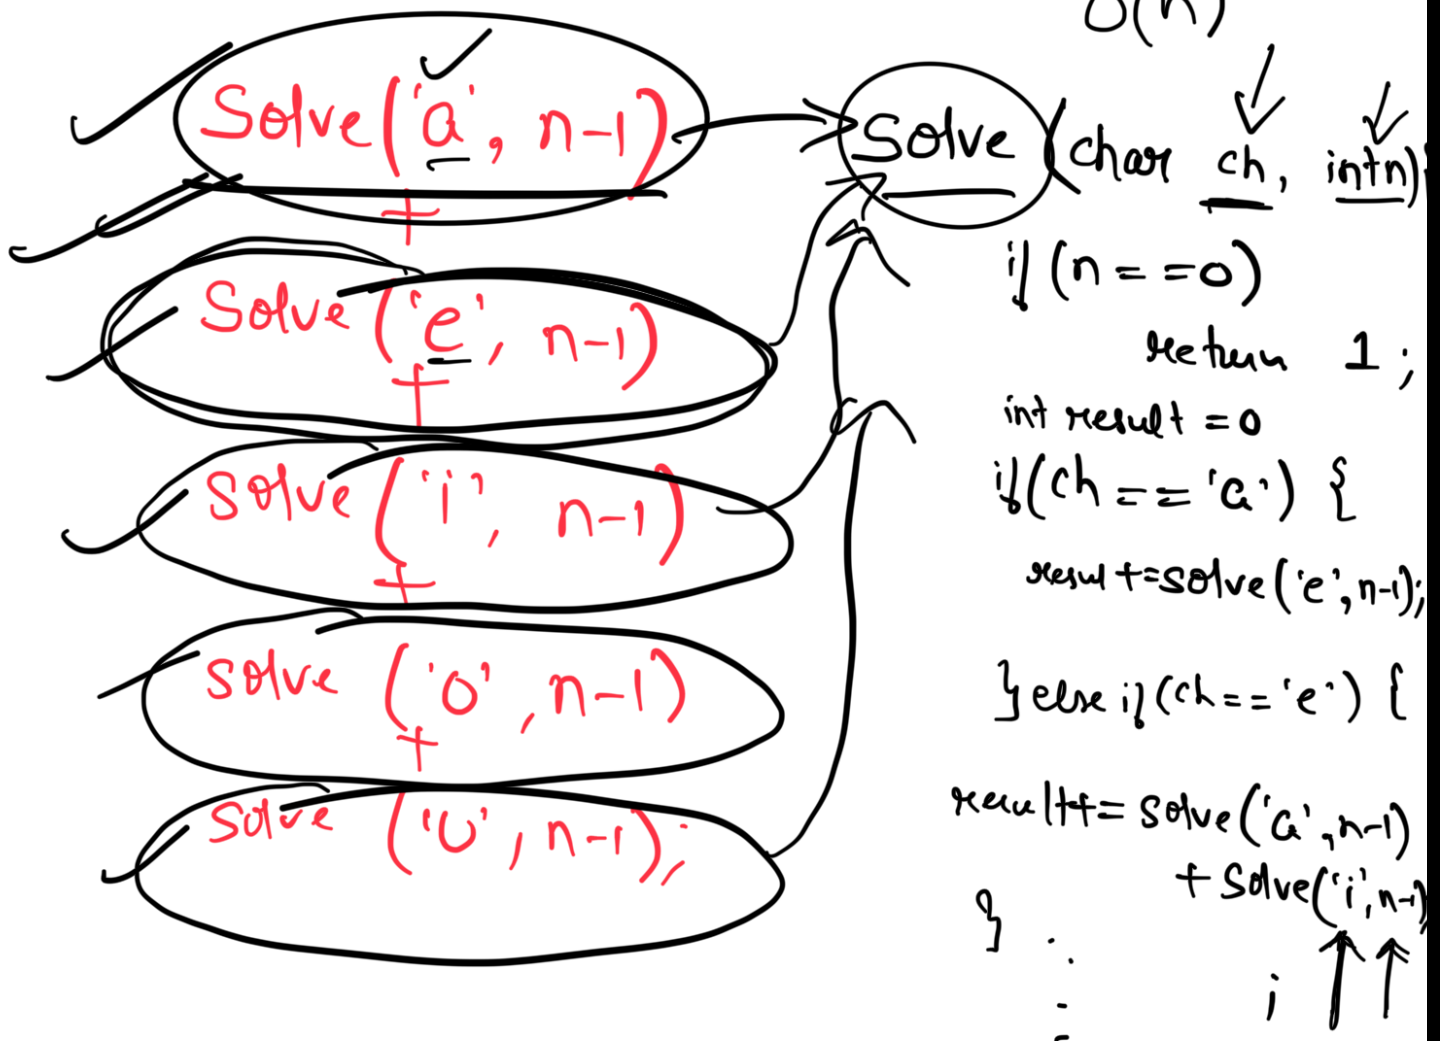

10

$n = 2$

$O(n)$

$O(n)$

} return result;

a, e, i, o, u

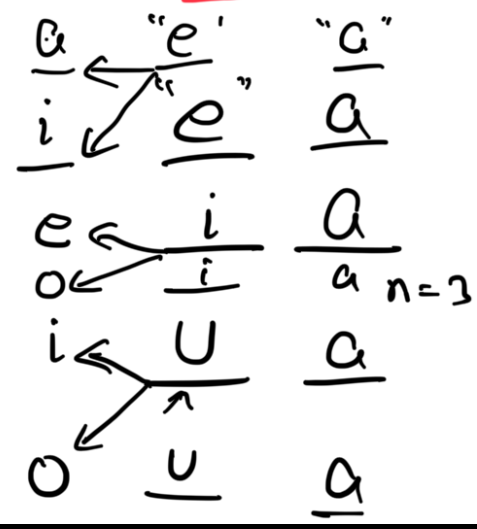

memoize = [ch] [int]

Bottom up

solve(ch, n)

$a \rightarrow e$
 $e \rightarrow a, i$
 $i \rightarrow a, e, o, u$
 $o \rightarrow i, u$
 $u \rightarrow a$

n=3
n=2

State Definition :-

i=0 → a

i=1 → e

2 → i

3 → o

7 → 0

$f[i][j]$ = # of strings ending at character i of length j

↓
 $f[0]$

↓
 $f[1]$

↓
 $f[2]$

↓
 $f[3]$

↓
 $f[4]$

n-1 n-2 n

Solve $f[a][n]$;

$f[e][n]$;

i

o

i

o

Dry Run :-

$$\begin{aligned}
 t[a][1] &= 1 \\
 t[e][1] &= 1 \rightarrow \text{"e"} \\
 t[i][1] &= 1 \rightarrow \text{"i"} \\
 t[o][1] &= 1 \\
 t[u][1] &= 1
 \end{aligned}$$

$len = 2,$
 3
 4
 \dots n

$$\begin{aligned}
 t[a][n] &= x \\
 t[e][n] &= y \\
 t[i][n] &= z \\
 t[o][n] &= s \\
 t[u][n] &= k
 \end{aligned}$$

$t[5][n+1];$

$O(n)$

for (int len = 2 ; len <= n ; len++) {

$$\begin{aligned}
 t[a][len] &= t[e][len-1] + t[i][len-1] \\
 &\quad + t[o][len-1] + t[u][len-1]
 \end{aligned}$$

$t(i) \text{ (len)}$ —

$t[0] \text{ (len)}$ —

$t[0] \text{ (len)}$ —

}
